What drove fund performance during the past six months?

- U.S. equities moved higher over the 6-month period ended December 31, 2024.
- The U.S. election results, inflation, and the direction of interest rates were key influences on the markets during the period.
- Large cap stocks returned 8%, while the covered call index (CBOE S&P 500 BuyWrite Index) delivered a respectable 12% return over the period.
- At period end, approximately 46% of the portfolio was unhedged, with long-term capital growth the primary objective.
- Exiting the period, the rest of the Fund is invested in companies with covered call options, a strategy that seeks to balance the capital growth potential of the underlying companies with downside protection provided by the income generated from writing options.
- Contributing positively to performance were several names in the energy sector.
- Conversely, select holdings in the consumer discretionary sector detracted from relative performance.
